Symposium Concept

Driven by technological developments, but also by social, economic & cultural shifts, the world of work is evolving. Gradually moving towards an era where man and machine shall co-work by deploying technologies such as Artificial Intelligence, big data, robotics, IoT at the site of work and otherwise, the challenge of the future will be to extract the best out of this co-working relationship. With an aim to encourage an exchange of views, to deepen our understanding of the issues and to start deliberating on possible responses to the changing world of work, the DWIH New Delhi's symposium "Future of Work" will bring together eminent Indian and German academicians, industries, scientists, researchers, policymakers, representatives of international organisations.

Symposium Panels

Artificial Intelligence and the New Working Environment

Exploring the opportunities and challenges of modern technology on production and working environment in the changing world of work.

Redesigning Workspaces

Looking at how newly designed and tech-integrated workspaces will impact the creativity and innovation of organisations in the future.

Working together with AI

Evaluating the potential of Human-AI Collaboration as the defining trend of the Future of Work.

Impacts of New Technologies on People

Understanding the consequences of automation and digitalization for people and society.

Realigning Work Processes

Charting trends in manufacturing and process-innovation in the changing world of work.

Organizer - DWIH New Delhi

The German Centre for Research and Innovation - DWIH New Delhi is one of the strategic initiatives of Germany's Federal Foreign Office, to internationalize science and research.

DWIH New Delhi facilitates scientific collaboration and research & development projects between German and Indian scientific community and industry. We offer an active link between stakeholders in public and private sectors and scientific communities in India and Germany through institutional networking within the innovation ecosystem

We are supported by 15 German organizations comprising of funding organizations, industry associations, research centres and universities.
